Box No. I Basis of the report

1. With regard to the **language**, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.
 - ☐ This report is based on translations from the original language into the following language , which is the language of a translation furnished for the purposes of:
 - ☐ international search (under Rules 12.3 and 23.1(b))
 - ☐ publication of the international application (under Rule 12.4)
 - ☐ international preliminary examination (under Rules 55.2 and/or 55.3)
2. With regard to the **elements*** of the international application, this report is based on *(replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):*

Description, Pages

1-17 as originally filed

Claims, Numbers

1-33 as originally filed

Drawings, Sheets

1/17-17/17 as originally filed

- ☐ a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing

3. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages
- ☐ the claims, Nos.
- ☐ the drawings, sheets/figs
- ☐ the sequence listing *(specify):*
- ☐ any table(s) related to sequence listing *(specify):*

4. ☐ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).

- ☐ the description, pages
- ☐ the claims, Nos.
- ☐ the drawings, sheets/figs
- ☐ the sequence listing *(specify):*
- ☐ any table(s) related to sequence listing *(specify):*

* If item 4 applies, some or all of these sheets may be marked "superseded."

Re Item V.

- 1 Reference is made to the following documents:

D1 : US 2003/085262 A1 (EVANS JAMES IVOR ET AL) 8 May 2003 (2003-05-08)

- 2 Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parentheses applying to this document):

A blister and package apparatus (100) comprising : a blister card (170) for sliding into an outer package (101), the blister card further comprising : a formable base (180), one or more blisters formed in the base, the blisters having open cavities for holding products (184), and one or more layers of frangible sheet material (182) over openings in the cavities for closing the cavities and holding the products in the cavities and for opening to release the products from the cavities, the outer package further comprising : one or more pieces of sheet material for creating an enclosure for holding the blister card, an interference mechanism (156,179) for preventing complete separation of the blister card and the outer package,

From this, the subject-matter of independent claim 1 differs in that:

the interference mechanism comprises a catch flap attached to the outer package and an interference stop on the blister card for contacting the catch flap on the outer package.

- 2.1 The subject-matter of claim 1 is therefore novel (Article 33(2) PCT)

The problem to be solved by the present invention may be regarded as:
simplifying the blister card.

- 2.2 The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

the blister card contains one or more additional cavities that form an interference mechanism or interference blister. The interference blister cavity does not hold product, and the catch flap is included in the outer package, in that way the carton sheet (170) of the existing art can be disposed of.

- 2.3 Claims 2-24 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty.
- 3.1 The same reasoning applies for the independent claim 25, and the subject-matter of this claim is therefore novel (Article 33(2) PCT).
- 3.2 Claims 26-29 are dependent on claim 25 and as such also meet the requirements of the PCT with respect to novelty.
- 4.1 The independent claim 30 deals with a method for a blister and package system according to claim 1, and the subject-matter of claim 30 is therefore novel (Article 33(2) PCT)
- 4.2 Claims 31-33 are dependent on claim 30 and as such also meet the requirements of the PCT with respect to novelty.
